👤 Summary

I am a Full Stack Web Developer with solid training from EBAC (SEP-certified, graduating with a perfect 10/10). My experience includes developing complete web solutions such as fashion and gym e-commerce platforms with admin dashboards, as well as a crypto landing page, using technologies like React, Redux Toolkit, Node.js, Spring Boot, MySQL, and MongoDB. I focus on building scalable, user-friendly applications, writing clean code, and delivering responsive designs. My background also includes academic studies in the U.S., which gave me exposure to international learning environments and diverse perspectives.

Full Stack Developer (Personal & Academic Projects)
EBAC – SEP Certified Training
Jan 2024 – Present | Remote / Mexico City

- Developed **fashion and gym** e-commerce platforms with integrated admin dashboards, enabling product management, user authentication, and order tracking.
- Built a **crypto landing page** with responsive design and modern UI using React, TailwindCSS, and animations.
- Designed and implemented **REST APIs** with Spring Boot and Node.js, including Swagger documentation and Postman testing.
- Managed **databases** with MySQL, MongoDB, and Supabase for user and product data.
- Configured **deployments on AWS EC2 and S3**, using Linux servers and GitHub Actions for CI/CD pipelines.
- Ensured code quality with **unit testing** (Jest, JUnit) and collaborative practices (GitHub pull requests, Agile sprints).

2016 - Present

Full Stack Developer

PowertTrain Co.

Junior Full Stack Developer with hands-on experience in personal and academic projects using **React, Redux Toolkit, Spring Boot, Node.js, and SQL/NoSQL databases**. Passionate about web development, scalable applications, and responsive design. Seeking my first professional opportunity to apply my knowledge and continue growing in the tech industry.

Full Stack Developer

CoreDex

- Developed **e-commerce platforms** (fashion and gym supplies) with product catalog, categories, cart, and checkout workflows.
- Built **admin dashboards** to manage products, users, and orders, integrating CRUD operations with databases.

- Agile / Scrum (basic knowledge, project sprints)
- Git & GitHub (branching, pull requests, version control)
- Jira / Trello (task management)

Programming Languages

- JavaScript (ES6+)
- TypeScript (intermediate)
- Java (Spring Boot)

Frontend Development

- React (functional components, hooks, Router)
- Redux Toolkit (state management, async thunks)
- Next.js (basic SSR/SSG)
- HTML5, CSS3, Sass
- TailwindCSS, Styled Components
- Figma (UI/UX prototyping)

Backend Development

- Spring Boot (REST APIs, JPA, Swagger docs)
- Node.js (Express basics)
- Authentication (JWT, sessions)

Databases

- MySQL (schemas, queries, relations)
- MongoDB (NoSQL, collections)
- Supabase (auth, storage, APIs)

DevOps & Infrastructure

- Linux (Ubuntu basics, SSH)
- AWS EC2 (deployment), S3 (storage)
- Docker (basic usage for local development)
- Mongo Express (DB admin)

Testing & QA

- Postman (API testing)
- Jest (unit testing React)
- JUnit (unit testing Java)

- Improved **application performance** by optimizing API calls and reducing load times on React frontends.
- Delivered a **crypto landing page** with responsive design and modern UI components using React + TailwindCSS.
- Applied **best practices in Git/GitHub** for version control, pull requests, and collaborative development.
- Automated **build and deployment** with GitHub Actions and configured hosting on AWS EC2/S3.
- Ensured **code quality** by writing unit tests (Jest, JUnit) and documenting APIs with Swagger.
- Worked in an **Agile environment**, participating in sprints, code reviews, and feature planning.
-

Featured Projects

Alphabet

Fashion Ecommerce + Dashboard (React, Spring Boot, MongoDB)

- Online fashion store with product catalog, categories, and search.
- Fully functional cart and checkout flow.
- Admin dashboard for managing products, users, and orders.

Gym Supplies Ecommerce + Dashboard (React, Redux Toolkit, Node.js, MySQL)

- Ecommerce platform for fitness and gym equipment.
- State management with Redux Toolkit, user authentication, and cart persistence.
- Dashboard with analytics, sales reports, and inventory control.

Crypto Landing Page (React + TailwindCSS)

- Responsive landing page for a crypto-related product/service.
- Modern UI with clean components and animations.
- Integrated sections for pricing, testimonials, and FAQ.
